

Call for Papers

Call for poster presentations related to food and sustainability

◆ Themes: Appropriate are themes surrounding food and its sustainability. We especially welcome multi-themed projects, as well as researchers looking to connect to a broad theme hereafter.

p.7 Lang, T., Barling, D., & Caraher, M. (2009). Food policy: integrating health, environment and society. OUP Oxford. (訳：平賀緑)

◆ Overview for abstract submissions: Please send a Word file including the title, an up to 200 word abstract, and the author's name, department, and title (file name should be the head author's name).

◆ Deadline for abstract submissions: October 9th, 2018

※ We will inform you about your acceptance by October 12th

◆ Where to submit: ecocheck@eprc.kyoto-u.ac.jp

◆ Attendance fee (materials fee)

General (by 20th Oct through bank transfer): 3,000 yen

General (payment at event): 4,000 yen

Student (by 20th Oct through bank transfer): 1,000 yen

Student (payment at event): 2,000 yen

※ Attendees from abroad are charged the price for advanced bank transfers even if paying at the event.

Kyoto University International Symposium Food & Sustainability

October 29-30, 2018

Kyoto University

Clock Tower Centennial Hall

For registration and enquires, please contact ecocheck@eprc.kyoto-u.ac.jp

※ As the program may slightly change from the contents here, please consult the latest information

Sponsor: Kyoto University

Cosponsor (tentative): Kyoto City, FAO, Kyoto City Committee for the Promotion of Waste Material Reduction and others

Support/Cooperation: Hulic Co., Ltd., FP Corporation, TAIHEIYO CEMENT CORPORATION, Hieiyuba Honpo Yubahachi Co., Ltd. and others

Plan and collaboration: École de Kyodai (Ayano Kubo, Rojina Bade, Makiho Okuno, Ami Shirai, Saki Nishimoto, Shizuka Eshiro), TABLE FOR TWO Kyoto University (Hiroaki Matsuo, Chihiro Tanaka, Yukari Tojo), Second Harvest Kyoto

29th, Conference Room (Floor 2)

Sessions on Food and Sustainability

(13:00 - 18:00)

We are planning oral presentations from several researchers and stakeholders on the following themes related to food and sustainability, along with discussions based on these presentations. Themes are separated by room and time slot, though a portion of them run at the same time.

● Session themes

- Food and climate change Food and water problems Food policy Food and cities

● Kyoto University Coordinators (in no particular order)

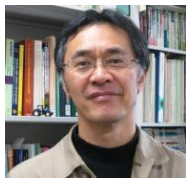

Motoki Akitsu
Grad School of
Agriculture

Misuzu Asari
Grad School of Global
Environmental Studies

Eiji Nawata
Grad School of
Agriculture

Roger C. Baars
Grad School of Global
Environmental Studies

**Yosuke
Yamashiki**
Grad. School of Advanced
Leadership Studies

29th afternoon – 30th evening

International Exchange Hall (Floor 2)

Research Posters on Food and Sustainability

About 30 people, including students and young researchers, will present posters on a wide range of research with food and sustainability as the theme. This is an opportunity to directly exchange thoughts on the latest research.

● Core time (presentation times slots): 29th, 15-16:00; 30th, 17-20:00

✂ Presenting on the 30th is reserved only for participants of the get-together

30th evening (18:00-20:00)

All participants will be invited to the networking dinner at International Exchange Hall (Floor 2)

Other events(in Japanese)

Exhibition, Food loss symposium, WS on food policy
(English translation will be available for some events)

30th, Large Hall (Floor 1)

Keynote Speech (9:00-)

Food and the city: Food policy in Toronto (tentative)

Dr. Lori Stahlbrand (Toronto Food Policy Council)

There are cities in the world with decades of history and experience in food policy. We invite a speaker from Toronto, a representative example. There is much to be learned from the history and experience of food policy designed by government officials, city residents, producers, business stakeholders, and researchers—all of who worked together to identify a number of issues and resolve them as organically as possible.

Special Symposium (10:00-12:00)

Realizing sustainable food

While food is our basic element, it also presents a number of problems. For example, to say that all 17 of the UN's Sustainable Development Goals (SDGs) relate to food is no exaggeration. In this symposium, we consider some of these goals, and while sharing problems and forefront measures, we also search for clues toward solutions.

● Planned presenters (titles omitted); Coordinator: Motoki Akitsu Kyoto Uni.,
Grad School of Agriculture

Isao Sakaguchi
Gakushuin Univ.,
Faculty of Law

Shinichi Sakai
Kyoto Univ.,
Environment Research
Preservation Center

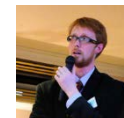

Setsuko Sugimoto
Administrative Director
of the Residence
Preservation Council of
Sugimoto Residence
(Important Cultural
Property) / Culinary
Researcher

**Steven
McGreevy**

Research Institute for
Research and Humanity

**Other FAO participants
(planned)**

Symposium secretariat

Assoc Prof. Misuzu Asari (KU GSGES/ecole de Kyodai)
